

## NATIONAL CYBERSECURITY CENTER OF EXCELLENCE

### MAY ENERGY PROVIDER COMMUNITY (EPC) MEETING

**Date** 5/26/2015

**Time Start-End** 3:00-3:30 PM

**Attendees** Ralph King (EPRI)  
Nadya Bartol (UTC)  
Brian Abe (NCCoE)  
Chris Peloquin (NCCoE)  
Jim McCarthy (NCCoE)

#### Discussion

- Build Monthly Update
  - Jim McCarthy mentioned that the first of two core Identity and Access Management (IdAM) builds using CA Identity Manager is close to 100% complete. CA workflows of grant, disable and modify access have been completed. A last minute addition of badge number provisioning to the workflow to support physical access control was made. The CA-based build will be finished, including end-to-end testing, by the end of the week.
  - A second build using RSA IMG is close behind.
  - Cisco's Identity Services Engine (ISE) is being integrated into the build to serve as a gateway between IT and OT. This addition is currently 80% complete.
- Practice Guide Monthly Update
  - Completed first internal draft.
  - Draft will include "How To" guides for recreating the build environment for energy providers.
  - The build will first be recreated by a separate internal NCCoE team before being released to the public (in draft form)
  - The guide will describe both the CA and RSA builds and provide a section for Alert Enterprise to showcase their full suite of IdAM capabilities.
  - The target release date for the draft IdAM Practice Guide is : 06/26/2015.

#### Conclusion/Closing Notes or Need to Follow Up

- Nadya Bartol requested a paragraph write up about the build to send to the Utilities Telecom Council (UTC) members as a primer for review of the IdAM Practice guide. Ralph King of the Electric Power Research Institute (EPRI) has agreed to distribute the guide to his fellow EPRI members as well.
