

## NATIONAL CYBERSECURITY CENTER OF EXCELLENCE

## ENERGY PROVIDER COMMUNITY OF INTEREST MEETING - MAY

Date 5/17/2016

Time Start-End 1-2 PM

**Attendees** 

**NCCOE** team and roles:

Jim McCarthy (Federal Lead) Don Faatz (NCCoE Lead Architect) Karen Hathaway Viani (NCCoE

Systems Engineer)
Julie Steinke (MITRE)

**Community Members:** 

Ron Beck (Central Lincoln) Bob Lockhart (UTC)

BOD LOCKHART (UTC)

Tim Clancy (Arch Street LLC)

Dion Bigornia (West Munroe Partners)

Samuel Oh (Consultant)

Robin Craib Keith Swanson

## **Agenda**

- NCCoE news and updates
- Cyber Security Framework (CSF) Overview
- Current projects
  - Situational Awareness (SA) project update
  - Identity and Access Management (IdAM) project update

## **Discussion**

- NCCoE meeting and conference review
- NIST CSF
  - o Fits in any industry, any sector
  - o Emphasis on mapping to existing standards, it is not a standard in and of itself.
- Projects:
  - Update to Situational Awareness solution:
    - Presented updates with installation/ integration and changes in architecture
      - Question regarding validating front end data flow. Response: anomalies will be detected upon analysis of data but not when data flows in.
  - Test case scenarios: presented refined test cases to be demonstrated through project.
    - Question: how would false positive/ negatives be presented? Response: we are considering that with the build. Currently do not know what data will look like; will learn what sensor response looks like following integration at University of MD.
  - Recognizing project partners.
    - Request for Community marketing materials for the NCCoE lab to recognize the Energy Provider Community participation.
  - IdAM solution: update final practice guide release very soon. Will alert EPC when it hits the presses!

Thank you for your continued support!
